	Freeman, Eric Head First Learn to Code : A Brain-Friendly Guide - A Learner's Guide to Coding and Computational Thinking With Head First Learn to Code you'll learn how to think computationally and how to write code to make your computer, mobile device, or anything with a CPU do things for you. Using the Python programming language, you'll learn step by step the core concepts of programming as well as many fundamental topics from computer science, such as data structures, storage, abstraction, recursion, and modularity. Based on the latest research in cognitive science and learning theory, Head First Learn to Code uses a visually rich format to engage your mind, rather than a text-heavy approach that puts you to sleep. - Met index. RESTful Java Web Services : A pragmatic guide to designing and building RESTful APIs using Java

Representational State Transfer (REST) is a simple yet powerful software architectural style used to create lightweight and scalable web services. RESTful web services use HTTP as the transport protocol and can use any message format. This makes RESTful web services easily interoperable across different languages and platforms. This successful book is now in its third edition and has been used by thousands of developers. It serves as an excellent guide to developing RESTful web services in Java. - Met index.
